

FROM TINY CLOSET TO PERFECT POWDER ROOM case study:

"We're really happy the SANICOMPACT let us design what we really wanted."

Goal

Create a functioning powder room in the basement for family and guests.

Approach

"We chose the SANICOMPACT – one of SANIFLO Canada's most affordable and (as the name implies) compact options. From a practical standpoint, the [advantages] were that it allowed us to [install] a sink and toilet without breaking up the concrete floor and without using the space a conventional toilet would have taken," explains Ed.

"We thought we were going to have to pull all the laminate floor up and break concrete in our basement. This would mean a dumpster rental and a total disruption in our lives. Because of this toilet, we are able to leave most of our stuff in place while we finished the closet-to-powder-room conversion."

"Homeowners get really excited when they learn that our toilets are just like regular toilets, with the advantage that they pump waste up and away to an existing soil stack, eliminating the need for expensive construction to break the floor," says Ross Evans, National Sales Manager for SANIFLO Canada.

If you've got a tight space in which a conventional toilet won't fit, the SANICOMPACT, a self-contained system with a built-in macerating pump is the perfect solution for a powder room, half-bathroom or other small space renovations. It's a great choice for homeowners looking for an affordable, space-saving option because if its novel, tankless design and built-in components.

Like all SANIFLO systems, the SANICOMPACT connects to your existing plumbing network and requires no rough-in, which means you can install it almost anywhere in your home. And, since there is no need to break the concrete or do any major construction, installation can be completed in as little as one day with less mess to worry about, making SANIFLO systems DIY-friendly. Not only do you save time, but you also save money on expensive renovation costs like equipment rentals and concrete removal.

Results

"We're really happy the SANICOMPACT let us design what we really wanted," says Ed.

Check out Ed and Robin's beautiful new powder room!
